Back End: MongoDB, ExpressJS, Node.js

Tools and Platforms: Git, Webflow, Trello, Figma, Wordpress

WORK EXPERIENCE

ACCENTURE, INC

March 2023 - Present

- Manage and support the HEAT ticketing system across Stage, UAT, and Production environments, ensuring timely request processing.
- Implement enhancements, light projects, and operational requests through configuration updates, workflow modifications, and form creation.
- Develop user-friendly forms integrating front-end and back-end components for seamless functionality.
- Conduct batch monitoring, troubleshoot failures, and generate reports using SSIS to track incidents and improve operations.

EDUCATION

Fullstack Web Development Bootcamp

Nov 2024 - May 2025

Uplift Code Camp

Bachelor of Science in Civil Engineering

2018 - 2022

Cagayan State University - Carig Campus

PROJECTS

SubmeterWise

- Web app designed to fairly distribute electricity costs among tenants based on individual submeter readings. It features an AI-powered chatbot to assist users with billing inquiries. The tool ensures accurate consumption tracking and transparent billing calculations, making electricity cost-sharing seamless and efficient.

Camera Shop

- Created a responsive camera e-commerce website using Webflow. The site includes product pages, a shopping cart, and an easy-to-use checkout process, providing a smooth shopping experience across all devices.

Personal Portfolio

- Designed and developed a personal portfolio website to showcase projects, skills, and experience, integrating interactive elements and a clean, user-friendly interface.
